

Smart Futures: Digital Twins

Reshaping Construction, Manufacturing, Semiconductor, and Smart Cities

(through) **Research & Innovation**

Presenter

Dr. Tariqul Islam
EU R&D Project Manager
DigitalTwin Technology

Company Introduction

DigitalTwin Technology GmbH

- **Founded in 2018**, an SME headquartered in Cologne, Germany
- **Our vision :**
Create advanced, open-source & tailored Digital Twin ecosystem for

- Construction
- Manufacturing
- Semiconductor
- Smart Cities

Digital Twin

Artificial Intelligence

3D Modeling of Machine

Sensor and Control

- **Our Digital Twin (DT) solutions**

- leverage **AI, 3D Modeling and Game engines** to develop IoT-driven DT platforms
- have **USP** of integrating **multi-physics simulation** leveraging **reinforcement learning**

Expertise

Our Team

- Digital Twin Engineers
- AI Engineers
- Physics Simulation Engineers
- Civil Engineers

RAHUL TOMAR
MANAGING DIRECTOR AND
CO-FOUNDER

JENS PIESK
CO-FOUNDER

HOLGER SPRENGEL
CO-FOUNDER

TARIQUL ISLAM
EUROPEAN R&D PROJECT
MANAGER

JESUS MORALES
SENIOR UNITY DEVELOPER

REHAN KHAN
DIGITAL TWIN DATA
MANAGER

JYOTHI PUDOTA
MACHINE LEARNING ENGINEER

MOHIT BHARGAV
DIGITAL TWIN SIMULATION
ENGINEER

GUARNER GONZALO
UNITY DEVELOPER
ENGINEER

MARC GALVEZ
UNITY DEVELOPER

RUCHA KATHE
DIGITAL TWIN SIMULATION
ENGINEER

RIA MATAPURKAR
CARLA DEVELOPER
ENGINEER

PRIYA CHAUDHARY
INTERN IN ROBOTICS

Research Projects & Results

Construction Projects

Funded by: EU Horizon 2020

Funded by: EU Horizon Europe

Co-Funded by: EU

Funded by: EU Horizon Europe

Smart City Projects

Funded by: EU Horizon Europe

Funded by: EU Horizon Europe

Manufacturing & Semiconductor Projects

Funded by: EU and ECSEL Joint Undertaking

Funded by: EU and ECSEL Joint Undertaking

Funded by: EU Horizon 2020

Project Results

- Digital Twin for Semiconductor Manufacturing process
- Digital Twin of Smart cities and construction sites

Tunnelware:

Digital Twin of Construction Sites
(<https://www.tunnelware.io/>)

Cityware:

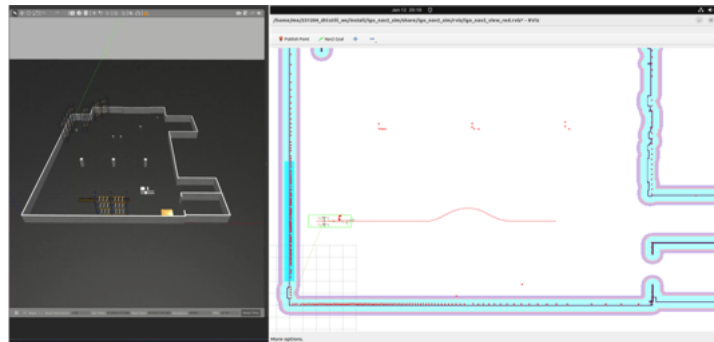

Digital Twin of smart cities
(<https://www.cityware.io/>)

Project Results and Future Partners

Project Results

- Sensor Behaviour Analysis (FEM-based solution) in different Scenario
- Robot Navigation system at Warehouse - Path generation and obstacle avoidance using AI
- AI based image anomaly detection for Manufacturing process

Project Partners

We are seeking project partners from:

- Industry (SME/RTO/LE)
- Academia

In Sectors:

- Construction, Semiconductor, Manufacturing, ICT, Smart City

Partner roles:

- Project partner
- Project coordination

To develop proposal and implement research activities.

Conclusion

Thank you, hope we got your attention

**CONNECT
WITH US**
