

**“Making urban transport
cleaner, safer, and more efficient!”**

VISION ZERO

- _emission
- _congestion
- _accidents
- _compromises

Our passion for FLAIT

Who we are:

- Development of urban mobility solutions since 2016
- German Start-Up since 2023

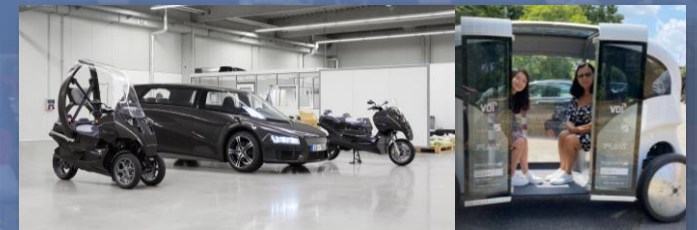

What we do:

- innovative holistic urban mobility systems
- special narrow vehicles with active tilting

Our strengths:

- decades long experience in design, construction & building of innovative vehicles & projects

FLAIT: topics for Horizon

Innovative urban mobility topics including

- precise routing & waypoint management
- fleet management & platoon driving
- teleoperation & virtual coupling of vehicles
- special vehicles i.e. for package transport
- obstacle detection & avoidance systems (onboard)
- city infrastructure for automated mobility & safety
 - sensors & signals for city traffic control
 - cameras, Radar, Lidar, etc. for obstacle detection
 - 5G & other networks for data transfer

FLAIT: What we are looking for

Partners for

- autonomous & automatic drive systems**
- teleoperation**
- sensors & systems for obstacle detection**
- fleet management & platooning**
- city infrastructure & data transfer**

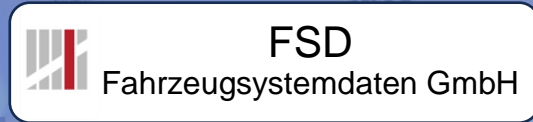

FLAIT: Our network & expertise
